

Pressure relief cover

Item numbers covered by this datasheet

Item	Name	Used with	Dim. [mm]
302740	Pressure relief cover A 040	302720	120×50×120
302741	Pressure relief cover A 065	302721	150×60×160
302742	Pressure relief cover A 095	302722	180×80×200
302743	Pressure relief cover A 150	302723	210×100×250
302744	Pressure relief cover A 250	302724	260×125×320
302745	Pressure relief cover A 385	302725	320×160×400
302746	Pressure relief cover A 615	302726	390×200×500
302748	Pressure relief cover A 1000	302728	480×250×600

General

For installation over the pressure relief to protect the intumescent element from water.

The cover is mounted directly to the wall, additional sealant may be applied.

Specifications

Materials: 0.8mm Zinc plated steel
(2 pcs. construction with rivets)

Dimensions: Mounting holes ø5mm, flares 25mm

Markings

None

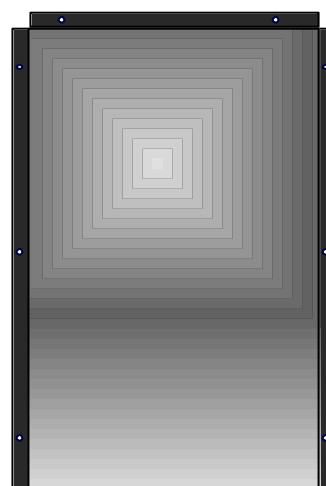

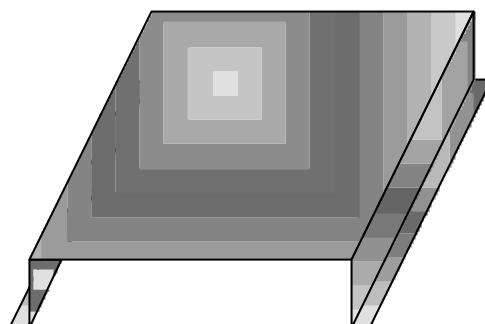

Installation

Screw directly to the wall using the ø5 holes in the flaps.
Additional sealant should be applied if there is risk of water running down the wall.

Ensure sufficient clearance from the outlet pipe to the cover sheet.

Maintenance

Inspect for corrosion, verify free flow of air.
