

APTB tool CO2 adapter kit

Item numbers covered by this datasheet

305147 APTB tool CO2 adapter kit

General

The APTB (Activation Pressure Test & Bleed) CO2 adapter kit replaces the 16g CO2 cartridge (item 305250) and the cartridge sleeve when the volume to test is larger than 228cm³.

Specifications

Thread connections:

Union to CO2 cylinder: W 21.8 x 1/14

Hose length: 1000 mm

Hose bend radius: 50 mm

Dimensions: See drawing below

Weight: 0.5 kg

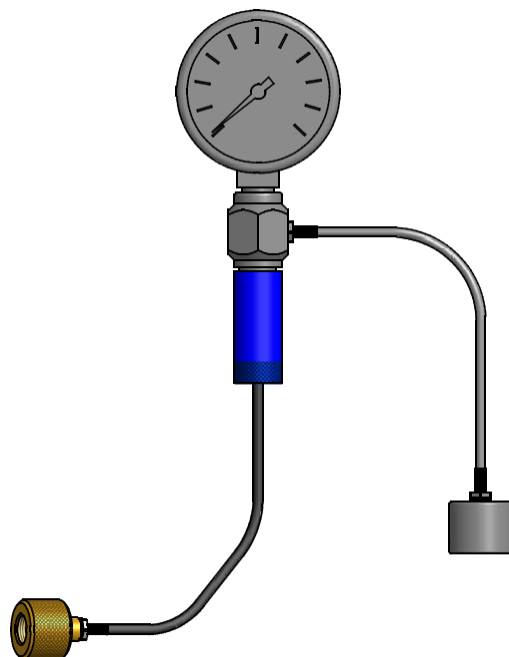

Operating

See description for the APTB tool.

Screw the CO₂ adapter sleeve tight on the APTB tool body and use the CO₂ cylinder valve to regulate the pressure and pressurize the system.

Maintenance

No serviceable parts. If a loss of performance is detected, replace the o-rings (11 & 21). If this does not solve the problem, the parts should be replaced.
