

Converter 24V / 230 Vac 120W

The converter is used for equipment that need 230 Vac and there is only 24 VDC available.

Technical specifications

Input voltage:	21-30 VDC
Output voltage: (modified sinus)	230 Vac +5/-10 % (50 Hz)
Power:	Continuous: >120 W Intermittent max. 40 min.: 150 W Intermittent: 250 W
Low battery alarm:	21 V
Low battery shut-down:	20 V
Protection:	Input low voltage, input over voltage, low battery alarm, over temperature, overload protection and short circuit proof.
Connection:	Battery clips

Mechanical specifications

Dimension: L×H×W: 125×150×65 mm
Weight: 0.5 kg

Standards

Electrical safety standard:	EN 60950
EMC standard Emission:	EN 500081-1
EMC standard Immunity:	EN 500082-1
