1931202	El Conduit Halogen free	5/8(16mm)
1931302	El Conduit Halogen free	3/4(20mm)
1931401	El Conduit FlexTube Halogen free Ø25	
1931501	El Conduit FlexTube Halogen free Ø40	

General

All the products are halogen free and eliminate the risk of hazardous combustion gases and smoke from the conduit. The normal conduit contain PVC/Halogen (chlorous plastics) which is very harmful to the human body under a fire.

Conduit (pipe) halogen-free rigid socket pipe, suitable for housing and industrial distribution in hospitals, schools, IT centers, etc. Suitable for environments with increased need of people and equipment protection.

Elbows with sockets on both sides, designed for 90° bend. Bending radius ensures smooth transition and allows easy retraction of wires and cables.

Sockets are designed to join pipes. Socketing of pipes and elbows reduces the consumption of connectors when making pipe installations.

Clips. Insulating clips are designed for fixing the pipe installations on the base surface. Pipes are installed by pushing between the clamp jaws. The clamps are equipped with elements for placing next to each other to create a continuous series of pipes.

Flex tubes for installation of cables in a wall or similar.
