

Flash Red 24VDC

The Xenon Beacons have been designed to complement other products in the range both technically and aesthetically.

The beacons will mount neatly onto a Squashni base sounder to provide a low profile sounder/beacon. Similarly the beacon can be supplied coupled to a Roshni electronic sounder to provide a high output audio visual unit.

The beacons have a built-in terminal block for ease of installation and utilise the same range of bayonet fitting bases as other products in the range.
(The mains beacon is supplied with a lockable, deep or 'U' base only.)

General specifications

Voltage:	20-30 VDC
Current:	90mA @ 24VDC
Power rating:	2.1W
Flash rate:	60 min-1
Flash Energy:	1.35j
Integrity:	IP65
Cableway:	Knock-out for M21 cable glands.
Colour:	Red
Dimension:	D x H: ø93 x 100 mm

Document: 407022 Flash red 24VDC
