**OEM** data sheet

# VESDA VLF VLF-500

The VESDA VLF-500 detector is a very early warning smoke detector designed to protect small, business-critical environments of less than 500 m<sup>2</sup> (5,380 sg. ft.).

The detector works by continually drawing air into sampling holes in a pipe network. The air is filtered and passed into a detection chamber where light scattering technology detects the presence of very small amounts of smoke. Detector status information is communicated on the detector display and via relays or optional interface cards.

### **Out-of-the-Box Operation**

The VLF can be installed and commissioned out-of-the-box without the need for a special interface or software programming tools.

# **Ultrasonic Flow Sensing**

The patented Ultrasonic Flow Sensing used in the VLF provides a direct reading of the sampling pipe flow rate. The system is immune to air temperature and pressure changes and is unaffected by contamination. The VLF is the first air sampling smoke detector to use ultrasonic flow sensing.

# **Features**

- · Out-of-the-Box Installation and Commissioning
- Ultrasonic Airflow Sensing
- Laser-Based Absolute Smoke Detection
- Pre-engineered pipe network designs
- · Programmable Alarm Thresholds
- Clean air barrier optics protection
   Instant Bassanition Display
- Instant Recognition Display
- Instant Fault Finder™
- AutoLearn™ Smoke
- AutoLearn™ Flow
- Field Service Access Door
- · Multiple Event Logging in separate logs
- Event log up to 18000 events
- · Offline/online configuration capability
- Up to 500 m² (5,380 sq. ft.) coverage

### **Listings / Approvals**

- CCC
- FM Class I Div II
- ActiveFire (ISO/AS 7240-20)
- Cl
- UKCA
- LPCB
- VdS
- NF
  - EN 54-20
    - Class A (30 holes / 0.05% obs/m)
    - Class B (30 holes / 0.15% obs/m)
    - Class C (30 holes / 0.32% obs/m)

Classification of any configuration is determined using ASPIRE.

Regional approvals listings and regulatory compliance vary between product models. Refer to www.xtralis.com for the latest product approvals matrix.

# 3.5" Display

The display provided to the user includes a Smoke  ${\sf Dial^{TM}}$  and alarm and status indicators.

When the field service access door is open, the user has access to the RESET U, DISABLE ■, Fire Test ♠, AutoLearn♦> and Instant Fault Finder functions. When the Instant Fault Finder function is activated, the Smoke Dial™ converts to a fault indicator, with the dial segment numbers corresponding to the faults listed below.

# **Legend of Fault Indicators**

| 1 | Filter    | 6  | External Device/PSU |
